

DISCOVER YOUR PASSIONS.

Your strengths and interests are uniquely your own. But we're here to help you to define them and understand how they can shape your future. You'll achieve a level of personal growth beyond what you ever thought possible.

ACADEMIC ADVISING

Guidance

You'll receive personal attention from an incredible team of academic advisors who will help you create a personal plan of discovery and transform your interests, goals and talents into a plan that's right you. They're also a great resource for helping you stay on track for graduation in four years and exploring ways to make the most of your college experience—both in and out of the classroom.

MCNAIR SCHOLARS PROGRAM

Research

If you think you might enjoy research, check out the McNair Scholars Program. This federally funded program offers eligible undergraduates opportunities to prepare for graduate study leading to the Ph.D. and careers in research and teaching at the university level. Scholars participate in workshops, GRE prep courses, a summer of mentored research, and travel to conferences and prospective graduate programs.

MAJOR EXPLORATION

Discovery

Choosing a major can be one of the most challenging and important decisions in a student's life. That's why we offer a variety of resources, advice and classes that allow you to explore the options available to you and help you make the choice that is right for you. There are many things to take into account such as your strengths, skills and interests. But don't worry; you'll have plenty of time to find the right fit for your future.

TESTING SERVICES

Knowledge

Uncover your potential through Testing Services. Our programs measure your knowledge and skills, promote learning and performance and support your education. We offer standardized tests for admissions and tests to determine your skill level in math, English, computers and foreign languages. We'll also help you receive credit-by-exam for the AP, SAT II and IB tests you took in high school.

FIND COMMON GROUND.

College should prepare you for your future. That's why we've created programming that provides you with the basic tools, perspectives and knowledge you'll need and helps you connect with your fellow students.

MAVERICK SCHOLARS

Intellect

Meet freshman students who share your major or area of interest through a Maverick Scholars Freshman Interest Group. You'll share common class schedules, participate in co-curricular programming, and develop lasting friendships and leadership skills—maybe even a residence hall room—while achieving academic success. Students encourage each other to succeed as they share experiences both in and out of the classroom.

FIRST-YEAR SEMINAR

Foundation

Transitioning from high school to college means understanding new expectations. Your First-Year Seminar is designed to help take your study and critical-thinking skills to the college-level while also exploring career and research opportunities within your major. The first step to success is learning effective academic self-management, and our team of faculty, students, and advisors will ensure you have the tools you need to succeed.

Inquiry

ONEBOOK

Share an intellectual experience with other freshmen as you read and discuss a chosen book in your first-semester English class. Faculty, departments and student groups sponsor events that complement the program. The result is an exchange of ideas and insights that crosses academic disciplines and embraces different perspectives. A theme taken from the book serves as an anchor for a broad array of events that are open to the entire community.

Graduate

GRADUATION IN 4

It's never too early to start thinking about graduation. In fact, the sooner you start planning, the better your chances are for graduating on time and in good academic standing. To learn more, University College offers an online guide to graduation, which offers helpful tips and tools you can use from your freshman to senior year to help make your goals a reality. It includes information on academic advising and developing a graduation plan.

LEARN FOR SUCCESS.

University College provides a welcoming, confidential environment that encourages you throughout your academic career. Our services will help you develop the intellectual, personal and social skills necessary for success in college and in life.

TUTORING

Persevere

College courses can be challenging, and sometimes you may need a little extra help. University College's Cost-Share Tutorial offers one-on-one tutoring with a certified tutor in selected 1000-3000 level courses.

The cost is \$6.50 an hour for all UT Arlington students. Successful students know when to ask for assistance, and our tutors are available to help with one troublesome concept or with course material over an entire semester.

SUPPLEMENTAL INSTRUCTION

Confidence

We know that a little extra review can sometimes make a difficult course more manageable. Supplemental Instruction provides weekly review sessions to help students succeed in traditionally challenging courses. Supplemental Instruction sections, led by peer leaders, can help you better understand course material, effectively review for exams and develop learning strategies that will help you achieve your academic goals.

ACHIEVE YOUR DREAMS.

We realize that everyone learns at their own pace, but in college, life gets pretty hectic. It's our mission to help you work smarter and more efficiently during your time at UT Arlington. Together we can create a plan to efficiently maximize your strengths, recognize your talents and help you reach your goals.

STUDENT SUPPORT SERVICES

Focus

Student Support Services provides free academic support to U.S. citizens or permanent residents who are either first generation, low-income, and/or disabled. Free services include tutoring, counseling,

advising, a private computer lab, seminars, cultural events, and a laptop, calculator, and textbook lending program. The goal of the program is to improve academic performance, increase retention and graduation rates and foster an environment that supports students.

COUNSELING SERVICES

Insight

Counseling Services is committed to helping students meet their full potential. We are available to help students increase their understanding of personal issues and make positive changes in their lives.

We provide individual, group, and couples counseling for currently enrolled students. Workshops are provided to address concerns including stress management, relationships, career assessment, and strategies for managing the college experience.

WE PUT THE POWER OF LEARNING IN YOUR HANDS.

At UT Arlington, you will not be a passive learner but rather an involved participant in your own education. You'll make the decisions that help you achieve your biggest plans. But you don't have to go it alone. University College brings together the resources you'll need in your first year and beyond to explore your options, feel connected, be a smarter learner and find academic success. We'll challenge you to set your sights high and give you the foundation you'll need to reach your goals.

Ransom Hall (above) is home to University College. It is the oldest building on campus and a place for students to gain solid footing from the beginning of their education at UT Arlington. Your accomplishments will stand on the legacy of those students who came before you.

To learn more about University College and the services it offers, be sure to attend New Maverick Orientation. To register, visit uta.edu/orientation.

Before you attend, be sure to check if you need to take the Texas Higher Education Assessment (THEA) for admissions. Visit uta.edu/admissions/successinitiative for eligibility requirements.
